PROFESSIONAL SUMMARY

Entry-level UX/UI professional with a background in user experience design and digital platforms. Experienced in user journey analysis, workflow optimization and designing intuitive digital experiences. Strong analytical and problem-solving skills with a passion for leveraging technology to create user-centered solutions.

EDUCATION

BS Interaction Design and Innovation | *National Taipei University of Technology (NTUT)* 09/2021 – 06/2025

- GPA: 3.65

PROFESSIONAL EXPERIENCE

UX/UI Designer / Web Developer | *IST Technology Company Limited* 07/2025 – Present

- Managed the end-to-end development of e-commerce storefronts across Lazada and Shopee, improving browsing experiences and storefront consistency.
- Redesigned and developed the corporate website to improve overall user experience.
- Analyzed user journey pain points and redesigned workflows to improve navigation clarity, usability and engagement.
- Monitored website usability feedback and identified improvement opportunities to enhance user interaction flow.

Web Designer (Freelance) | *SB Chemical* 07/2025 – 08/2025

- Redesigned corporate website structure and navigation to improve accessibility of product and service information.
- Conducted workflow and user flow analysis to improve user browsing efficiency and reduce friction points.
- Presented project insights and improvement recommendations directly to company leadership.

UX/UI Intern | *Orisma Technology* *07/2023 – 09/2023*

- Supported UX/UI design and website/mobile app development projects for major clients including SC Asset, Silom Complex and SHERA.
- Developed high-fidelity prototypes and internal portal concepts to improve operational usability and information accessibility.
- Worked closely with design and development teams to streamline communication workflows and project delivery.

PROJECTS

Emosphere — Interactive UX Installation | *Unity / Arduino* 08/2024 – 04/2025

- Designed an interactive installation combining physical interaction and digital systems to create an accessible and engaging user experience.
- Managed coordination between physical devices and digital systems to ensure operational reliability and responsiveness.
- Identified technical issues and optimized interaction flows to improve usability and system performance.
- Managed hardware integration, wiring and servo-based mechanical systems for the interactive installation.
- Featured at YODEX Taipei and Vision Get Wild Kaohsiung exhibitions.

Sunken Feeling — VR Thalassophobia Simulator | *Unity* 02/2024 – 07/2024

- Designed and developed a VR experience focused on interaction design, environmental feedback and first-person user experience.
- Translated abstract emotional experiences into an interactive first-person VR environment through environmental and interaction design.
- Focused on interaction feedback, environmental pacing and user flow to improve engagement and interaction clarity.
